For your benefit: We have developed further our system and made it smaller
SnowPlus is directly built in the snow gun
Multifunctional for all models
No additional device
No external weight

Snow-Tuning with

SnowPlus

Snow gun Filter inserts

Your advantage:

- * Higher quality snow and better slopes
- * 10% improvement in production possible
- * Economical and environmentally friendly
- * Reduces energy costs
- * Advantages in boundary areas
- * Longer snow periods
- * No additives

You're interested and would like to learn more?
I am happy to answer your questions and will explain
the figures, facts and mode of operation.

SnowPlus

Snow gun Filter inserts

*** Simple to use**
 SnowPlus filter inserts are simple to install in snow cannons water filters or water tanks.

*** Smaller crystals**
 SnowPlus alters the water structure and reduces surface tension. Water atomizes finer, freezes faster and crystallizes better.

*** More Snow**
 Snow is significantly drier. Water throughput can be increased by 10 to 20%. Increased production is possible with the same energy and labor costs.

*** Better slopes**
 The snow is finer and dryer. The slopes are more stable, less slippery and less icy, making them more resistant to skis, sun, war winds and rain.
